This diagram shows an exploded view of a mechanical assembly. The main component is a cylindrical housing (1) with a central opening and a flange. A central shaft or pin (3) is shown passing through the housing. A series of vertical ribs or fins (2) are shown attached to the side of the housing. Two small screws or bolts (4) are shown being inserted into the flange. A small cap or plug (5) is shown being inserted into the top of the central opening.

This exploded view diagram illustrates the assembly of a 100W LED light fixture. The components are numbered as follows:

- 1**: The main LED light housing, featuring a circular base with multiple LED chips and a central mounting hole.
- 2**: The mounting bracket, which is a circular plate with four mounting holes and a central hole for the mounting screw.
- 3**: The mounting screw, which is used to secure the mounting bracket to the ceiling or wall.
- 4**: The LED light housing, which is the main body of the light fixture.
- 5**: The LED chips, which are the light-emitting diodes mounted on the heat sink.
- 6**: The mounting screw, which is used to secure the LED light housing to the mounting bracket.
- 7**: The mounting screw, which is used to secure the LED light housing to the mounting bracket.
- 8**: The mounting screw, which is used to secure the LED light housing to the mounting bracket.
